## Use this template as a guide when creating your Periodic Table of Moles artwork.

- The element atomic number, symbol, name, and atomic weight will be added and superimposed over your artwork. Do not include fine details in the left hand corners, as they will be covered.
- Artwork should be 19 x 16.5 cm (7.5 x 6.5 inch), 300 dpi highest quality jpg, tif or psd file. Vector eps or Illustrator files are also acceptable.  
*(Note: Art may be larger but needs to retain proportion.)*  
CMYK is preferred but RGB is also acceptable.  
Hand drawn artwork is also acceptable — we will scan it for you.
- Try not to use text, arrows, or symbols in your artwork if possible.
- Images can have a light or dark background. We will use white or black Element Symbols and other text to work best with your artwork.
- All artwork must be original and cannot contain any copyrighted materials.
- Images are subject to approval
